

# BACH™

To experience Bach's neatly substantial form is a thrill. With breathtaking realism, Bach reveals a window upon the music possessing great clarity. Yet this clarity is achieved with remarkable weight and body. Complex harmonic overtones are captured within a soundstage that illuminates in its rendering of height, width and depth.

Do not allow yourself to be misled by Bach's trim, architectural appearance. Bach is capable of reaching down into the lower octaves with authority; convincingly reproducing the power and weight of largescale productions with ease. Still, its compact dimensions make this a very easy loudspeaker to integrate into your listening room, especially in this day of multiple channels, where five or more speakers may be called upon.

Because the human ear is remarkably discerning about transient "blurring", a phenomenon engineers refer to as cumulative spectral decay, a great deal of research went into development of a unique driver capable of reproducing the main attack of music with great precision. We employ a special triple-coated woofer that results in nearly ideal stiffness combined with excellent self-damping properties. After all, the emotion of music comprises both the notes and the rest, or space, between those notes. We blend in a silk dome tweeter for sweetly extended highs that can be enjoyed for hours.

Consider Bach for your main speakers, whether your passion is theater or music, with its magnetically shielded drivers, Bach provides a window upon the performance that must be experienced.

Impedance	6 Ohms
Frequency Response	38 - 20000 Hz
Sensitivity	90 dB
Recommended Amplifiers	30 - 200 Watts
Drive Units	
7" Mid-Woofer	Paper Cone, 3 x hand-coated
1" Dome-Tweeter	Silk Dome
Bass System	Bassreflex
Bass Function	QB 3 (Quasi Butterworth)
Crossover Components	
MKP Capacitors	Air Coils 0,7% tol.
Metal Film Resistors	2% tol., inductance free
Crossover Function 2-way	9/12 dB Bessel
Weight per Pair	68 lbs
Dimension (W x H x D)	7,5 x 33,7 x 9,8"
