

## WALTZ

The WALTZ is a speaker unlike any other, as multi-faceted physically as it is functionally, revealing its origins in one of Europe's capitals of music and design.

The strikingly angled walls of the ultra-thin and compact cabinet provide a myriad of mounting and placement options that lead to a multiplicity of uses. Either wall mounted or placed on stands, bookshelves and video monitors, the WALTZ can be used for main, center, rear and side channels. Wall mounting alone offers eight different possible positions.

The request for a speaker for near-wall application with beautiful integration in any living room has lead us to technological innovations, which allow a cabinet with only 9,5 cm / 3,7 inches depth, reaching true high-end sound performance without the least bit of compromise. The asymmetric shape enables the use of pure high-end mid-bass drivers, which have been developed for the specific cabinet volume of the WALTZ to allow for maximum low bass output. The combination of these dual 5,5" XPP drivers with acoustic suspension loading and a special ingenious crossover-subsonic filtering system results in huge power handling and output capabilities combined with astonishing dynamic range and control. This shielded driver compliment is accompanied by a 1" handcoated silk-dome tweeter with outstanding musicality and resolution.

Our unrivaled veneering technique brings out the beauty of real wood in 3 finishes: Black, Beech and Rosewood. Each speaker comes complete with mounting and connecting kit.

Research and technology allowed us to create this flat beauty: WALTZ offers all of our commitment to true high-end performance.

### Technical Data:

System Type	2 way
Bass System	Closed Cabinet
Frequency Response	70 - 20.000 Hz

Mid-Woofer	2 x 5,5" XPP-Drivers
Tweeter	Silk Dome

Sensitivity	91 dB
Impedance	4 Ohms

Dimension (W x H x D)	inches: 7,9 x 18,9 x 3,7
Dimension (W x H x D)	mm: 200 x 480 x 95
Weight per speaker:	17 lbs/8 kg
